Hi Deb,

Yes, I believe Sheila was mainly interested in discussing the NW Aluminum piece. Let's plan on talking at 2 pm on Monday. Here's a call-in #:

**(866) 249-5279**  
**PARTICIPANT CODE: 705000**

Bob

**Subject:** Re: Northwest Aluminum

Sheila and Bob,

I assume that what we'll be talking about relates to just the NFA areas, not items related to the permit? If so, then I won't get the RCRA folks involved. Monday I'm wide open but afternoon would be better for me. Tuesday I'm open only between 12:30 and 1:30 and from 4:00 to 5:00 pm.

---

Hello Deb,

Would you have time to check in on Monday or Tuesday of next week to update where we are on NW Aluminum?

Bob has been waiting for data clarification from Ch2M, so we have not forwarded the data comparison yet. However, I think the data will ease some of your concerns.

We also thought it might be useful for EPA to have an example of what the no further action may look like, so Bob will be forwarding a draft to your attention. We do want to make it clear that EPA's rights are preserved.

One question that has come up is, "after the certificate of completion has been issued, what is EPA's role in subsequent, additional cleanup?"

If you do have time for a check in call on Monday or Tuesday, please include Bob in your response since I will be out on Friday. I know it's short notice, so we may not have full representation but maybe we could answer questions.

Thank you,  
Sheila
